CLASS DESCRIPTION

POTTERY FOR KIDS MUDSKIPPERS

We are back to working with stoneware clay next session. This means we alternate between building our projects with wet clay and painting premade bisque projects on the other days. This way students get to both build and paint work. As always our projects rotate so any students that took the Fall class will not be doing any of the same projects. Each session we focus on the three basic types of pots (pinch, coil and slab) and build on them to create different projects. I'll copy the class description below: Ready to see the world through rainbow colored glasses? Join Mudskippers Pottery and start your Winter with an explosion of colorful glazed clay and a lot of play! Come get your hands dirty as we explore the world of pottery with stoneware clay, fired bisqueware and modeling clay. Come on and see how much fun it is to get muddy!

ROBLOX CODE ADVANTAGE

In this course, students will design, code and play their own 3D worlds with Roblox Studio! Students code using the programming language Lua which is currently the leading scripting language used in games. Roblox's special version of this language – Roblox Lua, enhances the experience as students manipulate environments and program while having fun. From Obbys (obstacle courses) to creating Simulator Games, our Roblox Studio Code classes allows kids to publish the games they make – showing friends why Roblox Lua is so awesome! Level 1: Learn about Roblox Studio and its many tools. Dive into Roblox Lua and how it helps express game functionality. Projects touch on various topics: how to build a tower, dialog between characters, make signs, create start buttons, and move platforms. Students create an Obby (obstacle course) where they put their fresh programming skills to the test!

THE ACTORS' TOOL BOX IMAGINATION STAGE

This class teaches key skills every actor needs to create a believable theatrical reality on stage. These skills include sensory awareness, active listening and reacting, building relationships with other actors, as well as vocal and physical expressiveness as a pathway to creating specific characters. These skills are built through theatre warm-ups, acting exercises, group improvisation, and scene work.

BULLS & BEARS SPARK BUSINESS ACADEMY

Learn how you can start investing at a young age and make your money grow! Pick your own \$10,000 stock portfolio with a cool stock-trading simulation tool using real-time market data. This hands-on experience empowers students with the tools and mindset to face future investment decisions with confidence and "buy low, sell high"! A solid foundation for successful future investors!

DEBATE CLUB SPARK BUSINESS ACADEMY

Students learn the art of persuasion and help select debate topics they find interesting. Students work in rotating groups and practice their debating skills in a supportive environment, including developing arguments, issuing rebuttals, providing examples, rebuilding their case, and summarizing points of view. Young debaters learn to think on their feet and enhance their public-speaking skills, gaining self-confidence in the process.

CHESS CLUB CHESS WIZARDS

Enter into the magical and exciting world of chess with Chess Wizards! You will participate in epic chess games, fun and interactive lessons, tournaments, team matches, trivia and more! Our specialized classes are a blast for everyone first through fifth. Whether you have been playing chess for your entire life and want to improve, are brand new to the game, or you just want to have a fun experience with your friends - Chess Wizards is the place for you!
